Subject to the Regulations and clause 2.9 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024; the asset allocation pattern indicated above for the Scheme may change from time to time. In the event of deviation from the mandated asset allocation of the Scheme mentioned in the SID due to passive breaches (occurrence of instances not arising out of omission and commission of AMC), then the AMC shall rebalance the portfolio within a period of 30 business days. Where the portfolio is not

	<p>rebalanced within 30 business days, justification writing, including details taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period.</p> <p>In case, the portfolio of scheme is not rebalanced within the aforementioned mandated plus extended timelines, AMCs shall: i) not be permitted to launch any new scheme till the time the portfolio is rebalanced. ii) not to levy exit load, if any, on the investors exiting such scheme(s).</p> <p>Rebalancing due to Short Term Defensive Consideration: Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations, legislative amendments and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute.</p> <p>These proportions can vary depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of the Unit holders. In accordance with clause 1.14.1.2 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, such changes in the investment pattern will be for short term on defensive considerations only and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.</p>
<p>Investment Strategy</p>	<p>The scheme aims to generate returns by investing in securities of companies that derive from companies exhibiting robust momentum.</p> <p>Momentum investing entails maintaining a portfolio of securities that have demonstrated favourable price trends over multiple timeframes. The momentum strategy may utilize multiple parameters, including price change, growth metrics and return indicators. The investment process begins with an analysis of liquidity and the availability of relevant data. Following this, a series of qualitative and quantitative screening criteria are applied to eliminate companies that do not meet the investment standards.</p> <p>Scheme's investment universe is top 1,000 companies by market capitalization. The Scheme employs a proprietary quantitative model to rank these stocks based on their momentum. This model calculates a momentum score using one or multiple metrics. For example, the fund might implement a price-based momentum strategy, evaluating the change in price movement of stocks over different periods, such as six months or twelve months or any other period to measure and select stocks.</p> <p>Subsequently, the fund manager reviews the model's output alongside their assessment of current market conditions or best opportunity criteria to select stocks and determine their respective weights within the portfolio. This discretionary process is designed to maximize momentum exposure. The Scheme aims to overweight sectors and stocks that are outperforming relative to its benchmark index, adjusting dynamically as market leaders shift. Additionally, the Scheme retains the flexibility to engage in opportunistic trading to balance the desired momentum exposure while striving to enhance risk-adjusted returns.</p>

	<p>During periods when the overall market is trending downward or exhibiting negative sentiment, or based on the fund manager’s discretion, the Scheme may allocate up to 100% of its net assets to equity and equity-related instrument derivatives for hedging purposes.</p> <p>The fund strategy will be reviewed, and the portfolio will be regularly adjusted to maintain a momentum exposure. The strategy will also be constantly evaluated and the fund manager has the discretion to modify the qualitative and quantitative metrics used to optimise the risk adjusted return.</p> <p>The fund will be actively managed and will have the flexibility to invest across market caps and sectors with a focus on high-quality high growth companies.</p> <p>The scheme may also invest up to 20% of the total assets of the Scheme in other than companies that will follow the momentum factor based investing.</p> <p>The AMC will endeavor to meet the investment objective of the Scheme while maintaining a balance between safety, liquidity and return on investments.</p> <p>Stock Lending Stock Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed.</p> <p>Portfolio Turnover Portfolio Turnover is defined as the lower of sales or purchase divided by the average corpus during a specified period of time. The Scheme, being an open ended Scheme, it is expected that there would be a number of subscriptions and redemptions on a daily basis. However, it is difficult to measure with reasonable accuracy the likely turnover in the portfolio of the Scheme.</p>
<p>Risk Profile of the Scheme</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <p>Scheme Specific Risk Factors: The portfolio will be constructed using our in-house proprietary screens, which evaluate various factor metrics, including historical price performance, volatility of returns, relative performance, liquidity, etc. The Scheme will be a diversified equity fund, predominantly investing in equity and equity-related securities selected based on these proprietary screens. Being thematic in nature, the Scheme will be affected by the risks associated with the momentum theme. Consequently, the momentum theme-based portfolio may exhibit higher volatility compared to other diversified equity-oriented schemes.</p> <p>Investing in thematic schemes implies that the Scheme will focus on companies aligned with a specific theme, which may limit its capability to invest in other companies or themes.</p>

	<p>As with all equity investments, there is a risk that companies within the theme may not achieve expected earnings results, or that unexpected market changes or internal company developments may adversely affect investment outcomes.</p> <p>Risks inherent in momentum trading include entering a position too early, exiting too late, and missing key trends. Additionally, frequent portfolio churning may lead to substantial losses due to adverse developments in capital markets or unfavorable market movements. As such, there can be no assurance that the investment objective of the Scheme will be realized.</p> <p>The Scheme-related risks include, but are not limited to, market risk, business risk, derivatives risk, concentration risk, interest rate risk, reinvestment risk, basis risk, spread risk, liquidity risk, credit/default risk, counterparty risk, duration risk, settlement risk, performance risk, prepayment risk, risks associated with investment in REITs and InvITs, risks associated with investment in debt instruments with special features, risks associated with securities lending, risks associated with investing in Securities Segment and Tri-party Repo trade settlement, and risks associated with the creation of segregated portfolios.</p> <p>For details on risk factors and risk mitigation measures, please refer SID.</p>
<p>Plans/Options</p>	<p>The Scheme has two Plans:</p> <p>(i) Regular Plan and (ii) Direct Plan</p> <p>Each Plan will offer: (i) Growth Option and (ii) Income Distribution cum Capital withdrawal (IDCW) Option.</p> <p>Regular Plan is for Investors who purchase/subscribe units in a Scheme through any Distributor (AMFI Registered Distributor/ARN Holder). Direct Plan is for investors who purchase/subscribe units in a Scheme directly with the Fund and is not routed through a Distributor (AMFI Registered Distributor/ARN Holder).</p> <p>IDCW Option: - Under this Option, the Trustee reserves the right to declare IDCW under the Scheme depending on the net distributable surplus available under the Option. It should, however, be noted that actual declaration of IDCWs and the frequency of distribution will depend, inter-alia, on the availability of distributable surplus and will be entirely at the discretion of the Trustees or any Committee authorised by them.</p> <p>If IDCW payable under the IDCW payout option is equal to or less than Rs. 500/-, then it would be compulsorily re-invested in the Option of the Scheme.</p> <p>Pursuant to clause 11.2 of SEBI Master Circular No. SEBI/HO/IMD/IMD-PoD-1/P/CIR/2024/90 dated June 27, 2024, IDCW can be distributed out of investor's capital (Equalization Reserve), which is part of sale price that represents realized gains. *Income Distribution cum capital withdrawal option.</p> <p>Growth Option: - All Income earned and realized profit in respect of a unit issued under that will continue to</p>

remain invested until repurchase and shall be deemed to have remained invested in the option itself which will be reflected in the NAV.

The AMC reserves the right to introduce further Options as and when deemed fit.
